COMPOSITE CATTLE

In recognition of the growing influence Composites are having in Australia's beef herd, a show section has been introduced to create comparisons, stimulate discussion and develop industry benchmarks.

At the 2003 Royal Melbourne Show, we introduced competition classes for Composite breeds in an effort to make the Show more relevant to the commercial beef cattle industry.

In 2004, we will continue to offer a section for Composite breeds.

This section will run parallel to our stud classes. It should be noted that Composite cattle will not be eligible for inclusion in the Interbreed competitions. They will comply with the Beef Cattle regulations, including the provision of registration documents.

BREEDPLAN

Breed Societies who have accepted the use of Breedplan data are Angus, Hereford, Shorthorn and Simmental.

Code of practice for the use of Breedplan data in Beef Cattle Judging at the 2004 Royal Melbourne Show is as follows:

- (a) Breedplan data is only available to be used in Beef Cattle Judging if:
 - (i) The respective Breed Society agrees for Breedplan data to be utilised in the judging of their breed of Beef cattle.
 - (ii) The respective Breed Judge then if he/she so desires, can then utilise Breedplan data in the breed judging.
- (b) Breedplan data is only used if both the Breed Society and Breed Judge agree for Breedplan data to be used. Subject to this agreement, Breedplan data will also be available ringside for the general public.
- (c) Breedplan data will then be utilised in accordance with the following:
 - (i) The Judge is not to rely solely upon Breedplan data to arrive at judging decisions.
 - (ii) The Judge is to assess each class visually without reference to Breedplan data to the point of making his preliminary placings in the class.
 - (iii) The Judge may then, if he/she so desires, ask for Breedplan data appertaining to those animals which he/she has provisionally placed 1st to 4th in the class and subject to item (iv), he/she may use the data to assist him/her in making his/her final placings among those four animals. The remainder of the class is to be placed by visual assessment only.
 - (iv) If any of the top four animals, as described in item (iii), does not have Breedplan data available to the Judge at the time of judging, then the Judge will complete his/her final placements without reference to Breedplan data for any animal in the class.

PERFORMANCE CLASSES

In order for a breed to have a Performance Class, there must be a minimum of three animals entered.

One Performance Class each will be available in the Angus, Hereford, Poll Hereford, Simmental, Murray Grey, Limousin and Shorthorn Breeds, provided animals entered are registered with Group Breedplan and have been entered and exhibited in their respective age class.

Performance Classes will be judged at the conclusion of the Supreme Exhibit Award in each individual breed provided that three (3) animals or more are exhibited.

Additional information distributed on performance figures of Exhibits during judging will be the responsibility of relevant Breed Society technical officers or suitably qualified Breed Representatives.

Performance Class Objectives:

- (a) To make Show selection closer to practical cattle selection using objective measurement with Judges acting in the role of a buyer ranking a group of potential herd sires for use in a commercial beef operation.
- (b) To promote improved genetic selection procedures for:-
 - (i) Cattle Breeders
 - (ii) General Public
- (c) To allow breeders to compare their cattle with others.

**COMPOSITE BREEDS
BEEF COMPOSITE SECTION**

In recognition of the growing influence Composites are having in Australia's beef herd, a show section has been introduced to create comparisons, stimulate discussion and develop industry benchmarks.

Because of the evolving nature of composite breeding, the traditional pedigrees and registrations are not applicable. The breed mix based on percentage content of each breed in the animal's make up is required. For the initial showing of Composites, eligibility is based on any of the three definitions in the Composite Beef Breeders Australia website www.compositebeef.com.au and are:

CLOSED COMPOSITE a composite which has been closed after the initial crossing, then stabilised for two or more generations.

OPEN COMPOSITE the breed mix has been stabilised, but new introductions are made, of the same or similar breed mix.

CROSSBRED first and second crosses. These may be part of the development phase of a Composite.

Information required on entry form as well as all the usual exhibitor information.

Date of birth.

Name of Composite (if any) (e.g. Meatmax).

Breed composition: (name of breeds and percentages).

Championship prize money will only be paid if there are 3 or more exhibitors in this breed.
